Considerations for Resource Group

- When creating and placing resources within resource groups there are a few considerations to take into account:

- Each resource must exist in one, and only one, resource group.

- A resource group can contain resources that reside in different regions.

- You decide how you want to allocate resources to resource groups based on what makes the most sense for your organization.

- You can add or remove a resource to a resource group at any time.

- You can move a resource from one resource group to another.

- Resources for an application do not need to exist in the same resource group. However, it is recommended that you keep them in the same resource group for ease of management.
